

Amendments to the Specification:

Please replace the paragraph beginning at page 12, line 13 with the following rewritten paragraph:

-- Also, since the sash drainage grooves 221, 211 are disposed above the frame drainage groove 121, 111; when the sash drainage grooves 221, 211 are filled with water, the water can be guided along the outer surface of the drainage groove flange 222,212 of the sash frame down to the frame drainage groove 121, 111. The flange 222 of the sash frame is spaced horizontally from the inner surface of the window frame. The upper and lower drainage grooves are combined well for drainage from the window. --
